Help: HI... I am getting this message when trying to resize... "Fatal error: Allowed memory size of 41943040 bytes exhausted (tried to allocate 3872 bytes) in /var/www/resize/resize.php on line 65"

Whats up?

John

Sometimes, we are unable to resize certain files because to do so would require more memory than we have available on our server.   Sorry for the inconvenience!
