Help: How do I enter a picture from my files to be used in your system? Your instructions do not elaborate.

To upload an image for resizing, click the "browse" button in the upper left hand corner of the screen.   Then, browse to where the image is on your computer.   If you're using Windows, you will probably need to click on "My Documents" and then "My Pictures" to get to your pictures.   However, this is not the only place your pictures might be.   You'll need to look around to find them, if you don't already know where they are.
